

In honor of Paco del Águila, who turns 60 this year, we are holding a celebration on November 22nd in the Salón de Grados, Mecenaz Building of the University of Granada.

The purpose of this meeting is to gather a few of the most prominent scientists that, together with Paco, played a role in the development of Particle Physics in the last thirty years; to discuss their contributions to the understanding of the Standard Model; and to elaborate on their insight to physics beyond.

The event will conclude with a banquet dinner on Friday evening.

For any questions visit us in <http://cafepe.ugr.es/pacofest>

### Invited Speakers

- Paul Langacker (IAS, Princeton)
- Pierre Ramond (University of Florida, Gainesville)
- Graham Ross (University of Oxford)
- Fabio Zwirner (Università di Padova)
- José Bernabéu (Universidad de Valencia)
- José Luis Cortés (Universidad de Zaragoza)
- Toni Méndez (IFAE, Barcelona)
- Ramón Pascual (ALBA Synchrotron, Barcelona)
- Mariano Quirós (ICREA/IFAE, Barcelona)

### Organizers

#### High energy Theory Group

- Juan Antonio Aguilar-Saavedra
- Jose Ignacio Illana
- Manuel Masip
- Manuel Pérez-Victoria
- José Santiago
